LOA: 26' / LWL: 21'4" / BEAM: 8'5" / DRAFT: 3' / Disp: 6700 lbs Twin keel, Masthead sloop, Built by Westerly Marine Ltd.

The Westerly Centaur was designed in 1968 by Jack Laurent Giles as a more modern and roomier replacement for the existing Westerly 25. She was probably the first mass-production yacht to have had the design tank-tested before a prototype was built, and this, plus Laurent Giles's earlier experience with bilge keel designs, was probably the reason for the Centaur's good performance under sail. Looking at a roomy boat with good headroom and a powerful diesel makes many people regard Centaurs as motor-sailers. They are not - they actually sail very well, although as bilge-keelers they are always going to be slower to windward than similar sized fin-keelers.

This is a project, please enquire to chat in more detail.
More details to follow.

CURRENT LOCATION: Wm Partington Marine – Hard Standing.
