This comprehensive easy to fit kit can complete change the boats handling. Not only does it help lift the stern a rduce drag, it also helps with steering. If the bow is pointing upwards the wind can catch it and make steering difficukt. With trim tabs fitted this lowers the bow and puts more of the vessel in the water given more resistance from cross winds. Plate width can be discussed with us to optimise your installation.

Please ask for more information and technical advice from our resident engineers and boatbuilders.

Packing, Freight and V.A.T. Extra on all U.K. & E.C. Sales.
