- 2.4 m/8 ft

The ZAR mini AIR range of inflatable tenders with high pressure deck and keel offer class leading internal capacity and comfort whilst remaining compact and lightweight.

The wide beam along with a squared off bow provides plenty of space for crew and luggage, whilst the large diameter tubes ensure passengers are protected from waves and spray.

The rigidity of the high pressure floor and keel mean that engine capacities are high for the size of the tender.

All models can be rolled up into the provided storage bag for easy transport or storage, as well as oars, pump, repair kit and operation manual.
